THERMOCHIMICA ACTA, VOLUME 172 (1990)

SUBJECT INDEX

Aerobic cell metabolism,
Microcalorimetric measurement of aerobic cell metabolism in unstirred cell cultures 105

Aqueous organic compounds,
Microbial calorimetric analysis (MCA): Analytic method for aqueous organic compounds 187

ATP-turnover,
Bacterial production, heat production and ATP-turnover in shallow marine sediments 147

Bacterial production,
Bacterial production, heat production and ATP-turnover in shallow marine sediments 147

Benzodiazepines,
Thermodynamics of the interaction of benzodiazepines with human serum albumin 197

Biochemical processes,
The use of calorimetry and thermodynamic analysis in probing the molecular details of biochemical processes: Activation of phospholipase A_2 1

Biological calorimetry,
Concepts on efficiency in biological calorimetry and metabolic flux control 31

Brachyuran megalopa,
Effects of nutrition (herbivore vs. carnivore) on the energy budget of a brachyuran megalopa 229

Calorimetric–respirometric ratio,
Importance of the calorimetric–respirometric ratio in studying intermediary metabolism of cultured mammalian cells 61

Cell-mass production,
Biothermodynamic studies for optimization of cell-mass production 241

Combustion of biological material,
Proposals for a standardized sample handling procedure for the determination of elemental composition and enthalpy of combustion of biological material 251

Cultured mammalian cells,
Importance of the calorimetric–respirometric ratio in studying intermediary metabolism of cultured mammalian cells 61

Cyclic dipeptides,
Group additivity thermodynamics for dissolution of solid cyclic dipeptides into water 11

3′-Cytidin monophosphate,
Binding studies on 3′-cytidin monophosphate and ribonuclease A derivatives by flow and batch calorimetry 21

Drug bioassay,
Drug bioassay, synergic interactions in drug combinations, thermodynamics and biologically based structure–activity relationships. A synthesis 81

Drug combinations,
Drug bioassay, synergic interactions in drug combinations, thermodynamics and biologically based structure–activity relationships. A synthesis 81

Effects of nutrition,
Effects of nutrition (herbivore vs. carnivore) on the energy budget of a brachyuran megalopa 229

Energy budgeting,
Energy budgeting in studying the effect of environmental factors on the energy metabolism of yeasts 95

Energy metabolism of yeasts,
Energy budgeting in studying the effect of environmental factors on the energy metabolism of yeasts 95

Energy reserves,
Energy reserves and storage polymers in intact bacteria analyzed by metabolic calorimetry 115

Environmental pollutant,
Pentachlorophenol – An environmental pollutant. Microcalorimetric investigations of an ecological model system 87

Escherichia coli,
Metabolic oscillations of *Escherichia coli* recorded by microcalorimetry 223

Ethanol tolerance,
The ethanol tolerance of *Pichia stipitis* Y-7124 studied by microcalorimetry 163

Glucose utilization,
Microcalorimetric determination of glucose utilization by *Leishmania* 203

Heat production,
Bacterial production, heat production and ATP-turnover in shallow marine sediments 147

HeLa cells,
Acute toxicity effects of mercury and other heavy metals on HeLa cells and human lymphocytes evaluated via microcalorimetry 131

Human blood cells,
Microcalorimetric studies of human blood cells in thyroid disease 157

Human lymphocytes,
Acute toxicity effects of mercury and other heavy metals on HeLa cells and human lymphocytes evaluated via microcalorimetry 131

Human serum albumin,
Thermodynamics of the interaction of benzodiazepines with human serum albumin 197

Intact bacteria,
Energy reserves and storage polymers in intact bacteria analyzed by metabolic calorimetry 115

Leishmania,
Microcalorimetric determination of glucose utilization by *Leishmania* 203

Living cells,
Application of microcalorimetry to the study of living cells in the medical field 53

Marine mussel,
Calorespirometry and spectrophotometry of the ciliated gill of the marine mussel *Mytilus edulis* (L.) 171

Marine sediments,
Bacterial production, heat production and ATP-turnover in shallow marine sediments 147

Metabolic calorimetry,
Energy reserves and storage polymers in intact bacteria analyzed by metabolic calorimetry 115

Metabolic flux control,
Concepts on efficiency in biological calorimetry and metabolic flux control 31

Metabolic oscillations,
Metabolic oscillations of *Escherichia coli* recorded by microcalorimetry 223

Metabolic rate,
Effects of experimental factors on the metabolic rate of T-lymphoma cells as measured by microcalorimetry 123

Metabolism in SV40-transformed 3T3 cells,
The effect of temperature on metabolism in 3T3 cells and SV40-transformed 3T3 cells as measured by microcalorimetry 75

Metabolism in 3T3 cells,
The effect of temperature on metabolism in 3T3 cells and SV40-transformed 3T3 cells as measured by microcalorimetry 75

Metabolism of cultured mammalian cells,
Importance of the calorimetric–respirometric ratio in studying intermediary metabolism of cultured mammalian cells 61

Microbial calorimetric analysis,
Microbial calorimetric analysis (MCA): Analytic method for aqueous organic compounds 187

Mytilus edulis (L.),
Calorespirometry and spectrophotometry of the ciliated gill of the marine mussel *Mytilus edulis* (L.) 171

Pentachlorophenol,
Pentachlorophenol – An environmental pollutant. Microcalorimetric investigations of an ecological model system 87

Phospholipase A_2,
The use of calorimetry and thermodynamic analysis in probing the molecular details of biochemical processes: Activation of phospholipase A_2 1

Pichia stipitis Y-7124,
The ethanol tolerance of *Pichia stipitis* Y-7124 studied by microcalorimetry 163

Plant tissues,
Simultaneous calorimetric and respirometric measurements on plant tissues 213

Ribonuclease A derivatives,
Binding studies on 3′-cytidin monophosphate and ribonuclease A derivatives by flow and batch calorimetry 21

Storage polymers,
Energy reserves and storage polymers in intact bacteria analyzed by metabolic calorimetry 115

Synergic interactions,
Drug bioassay, synergic interactions in drug combinations, thermodynamics and biologically based structure–activity relationships. A synthesis 81

T-lymphoma cells,
Effects of experimental factors on the metabolic rate of T-lymphoma cells as measured by microcalorimetry 123

Thyroid disease,
Microcalorimetric studies of human blood cells in thyroid disease 157

Tissue responses,
Calorimetric determination of tissue responses to thermal extremes as a function of time and temperature 179

Toxicity effects of mercury,
Acute toxicity effects of mercury and other heavy metals on HeLa cells and human lymphocytes evaluated via microcalorimetry 131

Unstirred cell cultures,
Microcalorimetric measurement of aerobic cell metabolism in unstirred cell cultures 105

Yeasts,
Energy budgeting in studying the effect of environmental factors on the energy metabolism of yeasts 95
